ARCA Teller Cash Recyclers

Empower Branch Tellers to Provide Faster, More Efficient Service

You want to deliver great consumer experiences in your branches – but that’s hard to do if your tellers are focused on counting cash. ARCA teller cash recyclers, offered by Fiserv through a partnership with ARCA, fit into every cash environment so you can deliver superior service anywhere in the branch.

How It Works

An ARCA teller cash recycler accepts, counts, authenticates, stores and dispenses cash while keeping an electronic journal of every transaction. Cash placed into the feeder automatically passes through a bill identifier, which determines its denomination and verifies authenticity. The device stores the notes in cassettes for dispensing in future transactions while monitoring cash inventory electronically for improved cash management.

ARCA teller cash recyclers significantly improves accuracy and efficiency in manual cash-handling so tellers have more time to connect with consumers and serve their needs.

Key Features

Key features of ARCA teller cash recyclers, which may vary by model, include:

- High performance operation with 99.2 percent uptime (most reliable recycler in the industry)
- Flexible capacity and denomination configuration options
- Modular design with standardized components that allow easy customization
- Ergonomic design that ensures comfort and ease-of-use in any cash-handling environment
